

CONTRACT MANAGEMENT POLICY

Limak Renewable, driven by its commitment to being one of the world's best and most innovative companies, fulfills all responsibilities to employees, subcontractors, suppliers, service providers, and stakeholders across national and international projects. It executes contract management processes to ensure that projects are designed, constructed, completed, and operated within the agreed timelines, budget, and performance standards, all while meeting international quality standards.

Limak Renewable carries out all efforts and activities in contract management with the objective of designing, constructing, completing, and operating renewable energy power plants and related works as part of national and international projects;

- Acts with the principles of integrity, honesty and fairness towards its counterparts in contractual matters, considering righteousness and honesty as its primary values in relations with employers, subcontractors, suppliers, service providers and other stakeholders.
- Pays attention to the confidentiality and protection of proprietary data and information of employers, subcontractors, suppliers, service providers and other stakeholders within the scope of relevant agreements. Such information and data are solely used for the purposes indicated in the “non-disclosure agreements” and/or agreements and disclosed to relevant persons within the authorizations designated.
- Contributes to the evaluation of subcontractors, suppliers and service providers with whom a contractual relationship shall be established with objective criteria in accordance with the corporate procedures and perform and conduct the required inspections and determinations in line with the relevant application principles and select them meticulously and carefully.
- Complies with the law and acts governing the relevant agreement, warns and provides guidance to the relevant parties and the counterparts within the scope of the agreement regarding the handling, evaluation and execution of the work and related issues within the scope of the agreement in accordance with the said law and acts.

- Endeavors in coordination and collaboration with the relevant teams and contributes to the effective and efficient execution and performance of the processes for the purpose of completion of the works undertaken duly at the contractual deadlines within the budgets contemplated meeting the performance requirements on the international quality standards.
- Contributes to ensuring that the contractual subcontractors, suppliers and service providers comply with and abide by the rules with respect to the occupational health and safety and preservation of the environment to fulfil the obligations towards the society, environment and employees and for the prevention and avoidance of all sorts of losses by establishing a safe and healthy working environment by acting with the awareness that employees are the most valuable asset of the corporation.
