

ENERGY MANAGEMENT POLICY

Limak Renewable Energy, with its 100% renewable energy generation portfolio, commits to integrating natural resource efficiency and energy efficiency holistically into all business processes and corporate strategies; and hereby undertakes to:

- Establish project-specific frameworks for setting and reviewing energy objectives and energy targets,
- Ensure the availability of information and necessary resources to achieve these energy objectives and energy targets,
- Comply with applicable legal requirements and follow national and international Best Available Techniques (BAT) regarding energy efficiency, energy use, and energy consumption,
- Drive continual improvement of the company's energy performance and the Energy Management System (EnMS),
- Support the procurement of energy-efficient products and services that impact energy performance,
- Support design activities that consider the improvement of energy performance,
- Evaluate opportunities for the efficient use of natural resources in energy generation activities and implement the necessary engineering and administrative controls,
- Conduct awareness-raising initiatives among all stakeholders to promote the utilization of renewable energy sources.
